

7-29-09

Dear Dr. Haiman,

It was such a pleasure to speak with you on the phone. You provided me with some excellent insight and advice. I have since read more of your articles and find your work to be amazing and compassionate. I studied child development at UC Davis before going on to dental school.

I would like to send you some information about my son \_\_\_\_\_ and our current battle so you can hopefully give me more insight on how this is affecting my son and his emotional development.

Thank you,
